Winter Gardening: Best Crops to Extend Your Harvest

You can grow organic vegetables and/or heirloom vegetables. Depending on where you live, you can plant a summer garden AND a winter garden. The possibilities are endless. Growing your own fresh produce is much less expensive than buying it in a grocery store. One tomato plant can easily produce 15 pounds of tomatoes.

This will prevent a windfall of one crop all at one time, and will extend your harvest of fresh vegetables over the full length of the growing season. Use a cloche or cold frame to protect seedlings. A small, clear shelter like a cloche will protect seedlings from pests, warm the soil, and provide more favorable conditions for delicate seedlings.

Winter crops to grow under cover.

There's no question that greenhouses, raised garden covers, and other forms of cover offer the gardener some of the best return on their money—and winter gardening is where these tools really prove their worth. The following vegetables will grow outdoors until hard frosts appear. Then they need protection to extend the harvest.
