~~Breastfeeding in Hospital: Mothers, Midwives and the ...~~

'Breast is best' is today's prevailing mantra. However, women - particularly first-time mothers - frequently feel unsupported when they come to feed their baby. This new experience often takes place in the impersonal and medicalized surroundings of a hospital maternity ward where women are 'seen to' by overworked midwives.

~~More mothers choosing midwives to deliver at UT Medical ...~~

Breastfeeding—the Thompson Method A new method of breastfeeding, developed by an Australian breastfeeding consultant (Dr RobynThompson) is associated with less pain and nipple damage. The Midwifery Research Unit is trialling this breastfeeding method in Mater Mothers' Hospital and has introduced a breastfeeding education package for midwives and lactation consultants to become skilled in the Thompson method.

Mothers will be offered assistance with breastfeeding during their hospital stay. Nurses and midwives will assess and document the effectiveness of the feeding. All breastfeeding mothers are taught correct positioning and attachment of their babies. Mothers will be referred to a lactation consultant if needed.

## ~~Midwives | Breastfeeding Niagara~~

Midwives, health visitors and trained local volunteer mothers (peer supporters) are there to help you get breastfeeding off to a good start. They can give you lots of information and support when you need it.

## ~~Breast Feeding | Hospital Authority~~

Support to assist the mother to breast feed her baby needs to start before her baby is born, through breast-feeding-friendly care and education by midwives during the facility's antenatal care, after she gives birth and, in combination with other community support, after discharge from the hospital.

## ~~Blog: Supporting breastfeeding: we know what works; let's ...~~

As practising midwives we have a wealth of knowledge and experience of helping mothers to establish breastfeeding both in hospital and at home. Our breastfeeding workshops will prepare you for a calm, confident breastfeeding experience.

## ~~Breastfeeding: woman's choice must be respected, midwives ...~~

Many background factors such as midwives' age, mothers' parity and the mode of childbirth were statistically significant in respect to the success of initial breastfeeding. CONCLUSIONS: More attention should be placed on the initial breastfeeding of infants born by caesarean section and primiparous mothers.

## ~~Our Services | Northwest Hospital & Medical Center~~

The women wanted to be seen as unique individuals by midwives and they wanted midwives to confirm their breastfeeding experiences. If midwives responded to the individual woman's needs, the woman felt positive about the breastfeeding support and that it was based on her as an individual.
