ELIMINATOR III LASERSCOPE SERIES Manual
Press one of the main switch buttons (On/Range buttons) on the lower front of the scope. There is one on either side, just behind the Objective Bell. Either button will work. Look through the scope. It should show two things: the Yards (Y) or Meters (M) indication illuminated along with the battery status indicator.

Burris Eliminator III - Manual (Page 2)
Remember, a scope with a click adjustment value of 1/4 inch at 100 yards will require four clicks to move the same 1/4 inch distance at 25 yards. Burris scopes have the click value indicated on a label under one of the adjustment caps. 2. Make adjustments on the scope by turning the adjusting screws the necessary number of clicks.

Manuals | Burris Optics
1. Point the scope at the sky or a plain wall and take a quick glance through the scope. If the reticle appears sharp and black, no further adjustment is necessary. 2. If the reticle does not appear sharp and black, take quick glances through the scope while rotating the eyepiece focus ring until the reticle pattern is sharp and black.

MTAC Riflescopes User Guide - Burris Optics
Mounting The Eliminator III™ LaserScope. 1. Select a Weaver-style or Picatinny-style mounting base. If a two-piece base is selected for a long action bolt rifle, the front base should be a reversible base which will need to be mounted with the extension pointed to the rear. We recommend the use of Burris Xtreme Tactical Bases as they were designed to accommodate the Eliminator III LaserScope.
