Cancer Conquest is perhaps the best two-hour education any practitioner or consumer can acquire on the state of alternative cancer treatment in 2006. I would highly recommend this video for the practitioner who is not involved in cancer work as well as any alternative or naturopathic clinic seeking to educate the client and patient base as to what alternative cancer therapy is about.

The Conquest of Cancer is ideal for medical specialists seeking less invasive therapies for their patients, as well as for anyone suffering from cancer and desperate for further, more positive information. One hopes that the medical community may one day see ATACIT in a different, more positive light; as Kalina writes, “The greater the resistance to a newly discovered principle, the greater its ultimate contribution to medicine in the general interest of society.”

Cancer, as a disease, was brought into the light of day. In 1937, the U.S. Congress made the conquest of cancer a national goal with a unanimous vote to pass the National Cancer Institute Act. This Act created the National Cancer Institute, which was expected to break new theoretical ground by conducting its own research, promoting research in other institutions and coordinating cancer-related projects and activities.

[1983] The Conquest of Cancer: Vaccines and Diet by Virginia Livingston Wheeler M.D. with Edmond G. Addeo cancer is caused by a bacterium, which I have formally classified as Progenitor Cryptocides. Moreover, this bacterium can be isolated and cultured, and a vaccine can be made from it that can help your immune system keep cancer suppressed and, if it appears, can help fight it off.
