The Basic Accounting Statements There are three basic accounting statements that summarize information about a firm. The first is the balance sheet , shown in Figure 3.1, which summarizes the assets owned by a firm, the value of these assets and the mix of financing, debt and equity, used to finance these assets at a point in time.

[MODULE 1 - IBTC](#)

By Maire Loughran . Financial accounting is the process of preparing financial statements for a business. The three key financial statements are the income statement, balance sheet, and statement of cash flows, and they serve two broad purposes: to report on the current financial position of the company, and to show how well the company performs over a period of time.

Format. The accounting worksheet is essentially a spreadsheet that tracks each step of the accounting cycle. The spreadsheet typically has five sets of columns that start with the unadjusted trial balance accounts and end with the financial statements. In other words, an accounting worksheet is basically a spreadsheet that shows all of the major steps in the accounting cycle side by side.

[Accounting Principles Question Paper, Answers and](#)

Income statement is prepared on the accruals basis of accounting. This means that income (including revenue) is recognized when it is earned rather than when receipts are realized (although in many instances income may be earned and received in the same accounting period). Conversely, expenses are recognized in the income statement when they are incurred even if they are paid for in the ...
