released in 2009. One example of this is the increased complexity of economic systems and emerging risk factors such as digital currency, both of which can present new and different types of risks to an organization on an international scale. What are the main differences? ISO 31000:2018 provides more strategic guidance than ISO 31000:2009

~~ISO 679 - Cement - Test methods - Determination of ...~~

This International Standard specifies a method of determining the compressive and, optionally, the flexural strength of cement mortar containing one part by mass of cement, three parts by mass of ISO standard sand and one half part of water.

~~INTERNATIONAL ISO STANDARD 679 - EVS~~

ISO 679:2009 specifies a method of determining the compressive and, optionally, the flexural strength of cement mortar containing one part by mass of cement, three parts by mass of ISO standard sand and one half part of water. ISO 679:2009 applies to common cements and to other cements and materials, the standards for which call up this method.

~~ISO 679:2009 - Techstreet~~

ISO 679 was prepared by Technical Committee ISO/TC 74, Cement and lime. This second edition cancels and replaces the first edition (ISO 679:1989), which has been technically revised as follows, based on comments received by the Secretariat.

~~International Standard~~

ISO 20340:2009 deals with performance requirements for protective paint systems for offshore and related structures (i.e. those exposed to the offshore environment, as well as those immersed in sea or brackish water). It can also be used for other structures, provided that the paints or protective paint systems selected comply with ISO 20340.
