GP44A4: Handling Blood Specimens for Common Lab Tests

CLSI Guideline H18-A4, "Procedures for the Handling and Processing of Blood Specimens", patient specimens that remain at room temperature after collection must be introduced to the seraSTAT blood cell separator within a maximum of TWO (2) hours from the draw.(3). Storage Properly collected anticoagulated whole blood specimens that

H18-A3 Procedures for the Handling and Processing of Blood

The Clinical & Laboratory Standards Institute (CLSI) provides standards and guidelines for medical professionals through its unique consensus process.

Guidelines for the standardization

Nccis Guidelines For Procedure Manuals About our Standards and Guidelines. Each CLSI Evaluation of Precision of Quantitative Measurement Procedures, Approved Guideline—Third Edition. Clinical Laboratory Technical procedure Manuals, Approved Guideline- Fourth Edition GP2-A4. Vol 22 #5 by NCCLS. (Paperback 9781562384586).

CLSI H18—Procedures for the Handling and Processing of—

H18-A3 Vol. 24 No. 38 Replaces H18-A2 Vol. 19 No. 21 Procedures for the Handling and Processing of Blood Specimens; Approved Guideline— Third Edition This document includes criteria for preparing an optimal serum or plasma sample and for the devices used to process blood specimens.

H18-A4 Procedures For The

GP44-A4 Procedures for the Handling and Processing of Blood Specimens for Common Laboratory Tests; Approved Guideline—Fourth Edition This document includes criteria for preparing an optimal serum or plasma sample and for the devices used to process blood specimens.

Newly Revised CLSI Guideline Addresses Handling and

Clinical and Laboratory Standards Institute document H18-A4—Procedures for the Handling and Processing of Blood Specimens for Common Laboratory Tests; Approved Guideline—Fourth Edition considers multiple variables that are involved in handling and processing blood specimens.

Buy GP44-A4, "Procedures for the Handling and Processing of Blood Specimens for Common Laboratory Tests," at CLSI. Browse our General Laboratory standards. ... The code has changed from H18-A4 to GP44-A4. Please make sure that the document title corresponds to the publication that you intend order.

ISO 15189:2012(en), Medical laboratories ? Requirements

CLSI H18-A4 provides detailed information regarding procedures for handling and processing blood specimens for laboratory tests. The time from blood-draw to storage, storage temperature, centrifugation parameters, storage volume and container type are all important considerations for sample processing [37, 44, 79, 94, 95].

H11-A4 Procedures for the Collection of Arterial Blood

CLSI H18 Procedures for the Handling and Processing of Blood Specimens for Common Laboratory Tests; Approved Guideline

Clinical Laboratory Standards Institute (clsi) Guideline

Procedures for the handling and processing of blood specimens for common laboratory tests (H18-A4) • Select the appropriate specimen type for the requested clinical chemistry tests (e.g., serum vs. heparin plasma); this should be based on specimen pre-centrifugation time, patient population and assay compatibility.
