Yunus Cengel Heat and Mass Transfer A Practical Approach 3rd

An energy transfer is heat transfer when its driving force is temperature difference. 1-10C Thermal energy is the sensible and latent forms of internal energy, and it is referred to as heat in daily life. 1-11C For the constant pressure case. This is because the heat transfer to an ideal gas is $mC_p\Delta T$ at constant pressure and $mC_v\Delta T$ at constant volume, and C_p is always greater than C_v .
