Ask The Experts | The Peony Garden

The current scientific review by Dr. Hong recognizes 54 species in the wild. His most recent review in English is Peonies of the world: taxonomy and phytoeography, published by the Royal Botanic Gardens, Kew, in 2010. The number of species found in the wild is quite different from the number of cultivars (human selections) found in...

Peonies of the World -- Hong De-Yuan -- 9781842464588

The peony or paeony is a flowering plant in the genus Paeonia, the only genus in the family Paeoniaceae. They are native to Asia, Europe and Western North America. Scientists differ on the number of species that can be distinguished, ranging from 25 to 40, although the current consensus is 33 known species. The relationships between the species need to be further clarified. Most are herbaceous perennial plants 0.25–1 metre tall, but some are woody shrubs 0.25–3.5 metres tall. They have ...

Peony Species

Peony Taxonomy

This species is surely one of the most endangered peonies. Paeonia cambessedesii has three distinct characters: 1) glabrous throughout; 2) leaflets 9 or even fewer in number, never segmented ; 3) a large number of carpels , which easily distinguish it from all of its allies.

Peonies of the World: Taxonomy and Phytoeography, De-Yuan

In 2010 Hong De-Yuan published Peonies of the World Taxonomy and Phytoeography, a scholarly, well-researched peony monograph focused on peony taxonomy and peony habitats. He followed this with the publication of Peonies of the World, Polymorphism and Diversity in 2011. Hong lists 33 species with 15 subspecies, for a total of 48.
