A high voltage insulated cable circuit

# Read PDF Power Cable Catalogue Nexans

consists of three single-core cables or one three-core cable with High Voltage sealing ends at each end. These sealing ends are also called "terminations" or terminals. When the length of the circuit exceeds the capacity of a cable reel, joints are used to connect the unit lengths.

Nexans cables include British &  
European standard medium/high voltage  
(MV-HV) power cables for distribution of  
11kV to 33kV electricity using polymeric  
insulated (XLPE) single or 3-core cables,  
with armour/unarmoured and copper  
wire or copper tape screen options.  
Nexans Cables & accessories

~~Industrial Wire & Cables Nexans~~

The products, described in this  
catalogue, are designed for connection  
of energy cable conductors (Class 1 & 2)  
with description of round solid (RE),  
round stranded (RM), as well as sector  
solid (SE), sector stranded (SM) and  
round stranded compacted (RMV). A  
check on basis of the actual existing  
conductor dimensions by the user is  
indispensable.
