Practical Navigation Tips: Beyond the Basics
1 st Feb 2015 (H. Subramaniam) PREFACE TO THE FIFTH EDITION. The overwhelming response, in India and abroad, to the "Nutshell Series" of books written by me, especially this first one - "Practical Navigation" - has encouraged me to keep thinking of ways by which improvements could be made with each subsequent edition.

Celestial Navigation - Latitude by meridian Alt part 1
A New and Accurate Method of Finding a Ship's Position at Sea, by Projection on Mercator's Chart, by Capt. Thomas H. Sumner, 1845 He discovered the (later so-called) line of position or circle of equal altitude, which he named "parallel of equal altitude" on a voyage from South Carolina to Scotland in 1837.

Practical Navigation Principles. Effect of wind. The preceding discussion on the Navigation Basics page explained how to measure a true course on the aeronautical chart and how to make corrections for variation and deviation, but one important factor has not been considered—wind. As discussed in the study of the atmosphere, wind is a mass of air moving over the surface of the Earth in a ...
