Industry 4.0 | Schaeffler Germany

Drive Train 4.0 Predictive maintenance expands conventional condition monitoring approaches by looking into the “future of the machine”, thereby offering new options for increasing efficiency and for reducing the total cost of ownership (TCO). Schaeffler’s “Drive Train 4.0” technology demonstrator links existing technology with new

Predictive Maintenance 4.0 Wind Power - schaeffler-fairs.de

Rauli Hantikainen (58) took over as Head of the Industry 4.0 strategic business sector of the Schaeffler Group at the beginning of September and will strengthen the Executive Committee Industrial ...

Predictive Maintenance | Schaeffler Group

Schaeffler components are equipped with intelligent sensors that make them essential enablers for Industry 4.0. Customers benefit from Schaeffler’s domain know-how: Condition monitoring solutions and cloud-based digital services for predictive maintenance continuously provide them with information on the condition of their machines and equipment.

INDUSTRY 4.0 Drive Train 4 - Schaeffler Group

#SchaefflerSolutions prove as attraction for the public - Hannover Messe 2016 The solutions and developments from Schaeffler regarding Predictive Maintenance 4.0 prove as a crowd puller at this ...

Rauli Hantikainen takes charge of industry 4.0 business ...

Innovative predictive maintenance solution wins LOGISTRA Readers’ Choice Award. The Maintenance 4.0 for Intralogistics concept for condition monitoring and semi-automatic maintenance was developed by SSI SCHÄFER in partnership with Schaeffler.

Predictive Maintenance 4 Schaeffler Group

What sounded like science fiction just a short time ago is now a reality in the new solutions available from Schaeffler: predictive maintenance. The automated rolling bearing diagnostics and the calculation of the remaining useful life of bearings are important components of Industrie 4.0.

Maintenance management for intralogistics | Schaeffler Germany

Company. The Schaeffler Group is already making a decisive contribution to “Mobility for Tomorrow” today with its high-precision components and systems in engine, transmission, and chassis applications, in addition to rolling and plain bearing solutions for a large number of industrial

applications.

Maintenance 4.0 for Intralogistics | Schaeffler Group USA Inc.

Schaeffler offers expandable complete solutions for Predictive Maintenance 4.0 with components, systems, and digital services for the monitoring and lubrication of a wide range of machines. The Perlenbach water supply association also relies on solutions from Schaeffler when it comes to pump maintenance.

Rotor Shaft | Schaeffler Group USA Inc.

The technology will support Schaeffler's Industry 4.0 strategy for tooling machines. This will look to improve overall equipment efficiency (OEE), including the optimisation of production processes, real time analysis of data and context-driven maintenance, networking and optimization of multiple machines within production lines. Schaeffler ...

Predictive Maintenance 4.0 - MRO Magazine

Note. You can collect several media for one order in the shopping basket. The maximum order quantity for each medium is: 20 pieces It is not allowed to sell material that has been made available at no charge.

Velomatic | Schaeffler Germany

News & Media. You can find up-to-date news from the Schaeffler Group, images for the press, background information, videos, and much more for use in editorial articles about our company in the Schaeffler press area.

Condition monitoring in plain terms | Schaeffler Germany

In collaboration with SSI Schäfer, Schaeffler has implemented an intelligent maintenance system for the operationally critical machinery at its newest logistics center. <https://www.schaeffler.com>.

Hannover Messe: Audience attractor - Predictive Maintenance 4.0 [Schaeffler]

Among them were the pneumatics specialist Aventics, the Schaeffler Group, ZF Friedrichshafen telematics subsidiary Openmatics, and Bosch Rexroth. An Industry 4.0 demonstration display operated by Bosch-Rexroth in Hall 23 showed how condition monitoring systems with predictive maintenance functionality can be integrated into production processes.

IBM and Schaeffler announce partnership for digital ...

Digital services provide recommended actions. In future, Schaeffler will be using its digital cloud services, the "LifetimeAnalyzer" for calculating the remaining useful life of bearings in drives, and the "ConditionAnalyzer" for in-depth condition analysis and predictive Maintenance 4.0.

Jobs | Schaeffler Group

Sensor technology for rotor bearings. Wear Debris Check. Condition Monitoring System

Rauli Hantikainen Takes Charge of ... - Schaeffler Group

The locating bearing is subject to particularly high axial loads as a result of the wind forces. We have optimized our proven standard spherical roller bearings in order to better fulfill the specific requirements in the wind turbine.
