The Principles of Toxicology: Environmental and Industrial ...

1 GENERAL PRINCIPLES OF TOXICOLOGY. Robert C. James, Stephen M. Roberts, and Phillip L. Williams. The intent of this chapter is to provide a concise description of the basic principles of toxicology and to illustrate how these principles are used to make reasonable judgments about the potential health hazards and the risks associated with chemical exposures.

Principles of toxicology - SlideShare

Toxicology is a scientific discipline, overlapping with biology, chemistry, pharmacology, and medicine, that involves the study of the adverse effects of chemical substances on living organisms and the practice of diagnosing and treating exposures to toxins and toxicants. The relationship between dose and its effects on the exposed organism is of high significance in toxicology.

Principles of Environmental Toxicology - 1st Edition - I ...

Since the publication of the second edition the field of toxicology and continued changing expanding. Principles of Toxicology: Environmental and Industrial Applications, Third Edition continues to present compactly and efficiently the scientific basis to toxicology as it applies to the workplace and the environment.

Principles of Toxicology: Environmental and Industrial ...

Environmental toxicology is the study of the action of chemicals upon ecosystems. Understanding the effects of exogenous chemicals upon the inhabitants of an ecosystem may enable us to predict and possibly prevent their deleterious effects. This textbook provides a good general introduction to all the major areas of environmental toxicology, including the fate of chemicals in the environment ...
