Semantic-Service Provisioning for the Internet of Things ...

The main reason for this is the lack of rich service specifications, concepts, and tools to process them. This book introduces advanced concepts in service provisioning and service engineering, including semantic concepts, dynamic discovery and composition, and illustrates them in a concrete business use case scenario.

Fog Based Framework for IoT Service Provisioning ...

A semantic web service, like conventional web services, is the server end of a client-server system for machine-to-machine interaction via the World Wide Web. Semantic services are a component of the semantic web because they use markup which makes data machine-readable in a detailed and sophisticated way (as compared with human-readable HTML which is usually not easily "understood" by ...

[Application and Outlook | SpringerLink](#)

Although the amount of offered Web services is continuously increasing and the Internet of products shifts more and more towards an Internet of services there is still a big lack of efficient service allocation and price determination. Currently, services are mostly charged as flat fees and pay-per-use prices. Albeit static pricing is the most common pricing scheme, dynamic and decentralized ...
