You should trust the math. Always trust the math over your intuition. I have never gambled significantly but I have always wondered how gamblers manage to make a living doing it. I suspect correctly analyzing situations like this might have something to do with it. ... Sleeping Beauty Problem. Can anyone refute my post #107? If not, I don't ...

~~Sleeping Beauty Problem—Page 5—Science, Math and ...~~

I agree. This problem is only "controversial" because it is poorly defined. If the question is, "What is the probability that the coin turned up heads?" then the answer is simply $1/2$. If the question is, "What is the probability that Sleeping Beauty will be correct if she guesses that the coin turned up heads?" then the answer is $1/3$.

~~The Sleeping Beauty Problem : math—reddit~~

This month's puzzle featured two variations on the famous Sleeping Beauty problem. We compared the original problem to a famous visual illusion, the Necker cube, which is a two-dimensional figure that can be perceived as a three-dimensional object in one of two different orientations, with both perceptions equally valid.
