The study of topology and its spaces is an important aspect of mathematics, topological spaces like other mathematical spaces have axioms that must be satisfied for a topological space to hold. Today i will be treating those axioms with solution to exercises from the book "Topology without tears" by Sydney A. Morris.

There is a facebook group called "Topology Without Tears Readers" where readers of the book can communicate with each other. But this is definitely not a place to ask others to solve your homework problems. If you ask questions like "How do you solve the problem ....." your post will be removed and you will probably be blocked from this group.

Topology by James Munkres, 2nd Edition Solutions Manual. The main solutions manual is solutions.tex. Some solutions have figures, which are done directly in LaTeX using the TikZ and PGFPLOTS packages. The python directory contains some quick and dirty Python scripts that were used to gain insight while working on some of the exercises. These are not documented at all and so probably will not be of interest to anyone else.
