*Does time work differently in different languages? - Hopi Time*

In physics, spacetime is any mathematical model that fuses the three dimensions of space and the one dimension of time into a single four-dimensional continuum. Spacetime diagrams can be used to visualize relativistic effects such as why different observers perceive where and when events occur.

*Space (and Time) for Culture*

Philosophy of space and time is the branch of philosophy concerned with the issues surrounding the ontology, epistemology, and character of space and time. While such ideas have been central to philosophy from its inception, the philosophy of space and time was both an inspiration for and a central aspect of early analytic philosophy. The subject focuses on a number of basic issues, including whether time and space exist independently of the mind, whether they exist independently of one another,

*Space and Time in Language and Literature*

The topic of space and time in language and culture is also represented, from a different albeit related point of view, in the sister volume *Space and Time in Languages and Cultures: Linguistic diversity* (HCP 36) which focuses on the language-specific vis-à-vis universal aspects of linguistic representation of spatial and temporal reference.

*Space, Time, and the Use of Language*

Space, time, and the use of language 1.0 Introduction The relationship between two conceptual domains of space and time is usually conducted in terms of language and cognition and the reflection of these two domains in these two spaces. Time is often represented in the studies as the phenomenon secondary in relation to space...

*Space and Time in Languages and Cultures: Language ...*

All human activity takes place in space and time in one way or another, which is consequently reflected in our language. We not only talk about space and time but also cannot but ground our linguistic activity in space and time.

Some language-like components are evident in the spontaneous gestures of chimpanzees in the wild (e.g., Hobaiter and Byrne 2011), but it is likely that language itself, whether gestural or vocal, emerged gradually through the six-million years separating us from our common ancestry with the chimpanzee, and not within the mere 200,000 years of the existence of *Homo sapiens* (Corballis 2016).

*Spacetime - Wikipedia*

This is an interdisciplinary volume that focuses on the central topic of the representation of events, namely cross-cultural differences in representing time and space, as well as various aspects of the conceptualisation of space and time. It brings together research on space and time from a variety of angles, both theoretical and methodological.

*Do You Know How to Say Space in Different Languages?*

Space-time is a mathematical model that joins space and time into a single idea called a continuum. This four-dimensional continuum is known as Minkowski space. Combining these two ideas helped cosmology to understand how the universe works on the big level (e.g. galaxies) and small level (e.g. atoms).

*Space And Time In Language*

expression of space and/or time in language and/or literature. The first section—Time and Space in Language—contains four papers which focus on linguistics i.e. explore issues relative to the expression of time and space in natural languages. Three articles explore the expression of space from various perspectives. The topics under consideration
