DISCRETE MEASURES. Thus, in the trial of nurse led secondary prevention clinics ( Evidence-Based Nursing, January 1999, p21), nurse led clinics significantly reduced the odds of hospital admission compared with usual care (OR=0.64); that is, there was a 36% (1.0-0.64) reduction in the odds of hospital admission.

*STATISTICAL COGNITION: TOWARDS EVIDENCE-BASED*

In the past few decades, evidence-based practice (EBP) has gained popularity as a transformative approach to healthcare. Nurses who have earned Doctor of Nursing Practice (DNP) degrees and utilize EBP will consult the best research evidence, relate it back to the patient's history and then merge care with the patient's own values.

*Statistics for Evidence-based Practice in Nursing ...*

Statistical analysis is one of the foundations of evidence-based clinical practice, a key in conducting new clinical research and in evaluating and applying prior research.

*Statistics for evidence-based nursing | Evidence-Based Nursing*

into account research results: This is evidence-based practice (EBP). We argue that, specifically, statistical practice and statistics education should be guided by evidence, and we propose statistical cognition (SC) as an integration of theory, research, and application to support EBP. SC is an interdisciplinary research field, and a way of
