two-post lift Two-posts use two hydraulic cylinders to power four arms to lift the car in a compact space. These lifts have a wide range of capacities, install easily, and leave all the car's ...

*Installation, Operation & Maintenance Manual*

When installing a two-post lift, what is more important, having plumb columns or frame contact pads that are level with one another? BendPak recommends installing the columns of a two-post lift in a manner that will result in the frame contact pads being level with one another. If the floor is perfectly level, then by all means, pay attention to the column plumbness.
